Packing List

Smart charging

1.Charge the earbuds:

The earbuds will be charged automatically after put into the charging case. When the L/R slowly with a breathing light effect. The corresponding L/R earbud battery level on the display screen of the charging case changes accordingly; When fully charged, the earbud LED indicator light will automatically turn off and the corresponding battery level display on the charging case will turn off after about 5 seconds.

2. Charge the charging case:

Connect the USB charging cable to charge the charging case, and the corresponding battery level display of the charging case is from1% to 100% until the charging case is fully charged. The earbuds should be smoothly put into the charging case and gently pressed to avoid the bad contact between the earbuds and the charging pin in the charging case, which will cause the charging failure.

First pairing procedure:

1. when the headset is taken out of the charging box, the indicator lights of the two headsets flash alternately in red and green. Within 30s, the indicator lights of the two headsets turn off and the pairing is successful. After 3-5s, the indicator lights of one of the headsets will flash alternately in red and green again. At this time, the pairing of the two headsets is successful and in the Bluetooth search state (Note: the first pairing may be the red / Green blinking of the R indicator light or the red / Green blinking of the L indicator light/ Green blinks alternately; it depends on which headset is taken out from the charging box first, and the single headset can also be paired with the mobile phone. When using the dual headset, you need to confirm whether the two headsets are paired successfully.)

2. turn on the Bluetooth of the mobile phone, find "W1" and click to confirm. The mobile phone automatically connects. After the success, the headset voice prompts "connected". The connection is successful

3. Take the headset out of the charging compartment, the two-stage headphones flash alternately in red / green at the same time, the main headset "flashes alternately in red / green" after 3-5s, and the auxiliary headphone light goes out; after the connection is successful, the two headphone lights go out.

Definition of function status of headset indicator:

1. When the headset is in charge state, the indicator light will be on red for a long time; when the headset is in full charge state, the indicator light will be on green, and the headset will not be used within 10s, and the headset will enter sleep state, and the indicator light will be off;

2. If it is not used for a long time, open the charging compartment, and the R / L two headphone indicators are not on, and in standby mode;

3. Use again in a short time, open the charging compartment, and the R / L two earphone indicator lights are red;

4. If you need to shut down in use, long press for 7S, voice prompt "power off", restart and long press for 7S again, voice prompt "power on", and the headset blinks and the traffic light alternates again

5. If the headset crashes during use, press and hold for 10s to restart the headset
